Appendix L

Roundabout Screening Form

Roundabout Screening Form

Version dated May 21, 2021

Date 2025-12-22

Name(s) of Analyst(s) DC

Short Name of Intersection York & Townline

Part A Preliminary Information

A1	Full name of intersection (all legs and Regional Road numbers)		
	<u>York Road (Highway 81) and Townline Road</u>		
A2	Intersection location (local municipality, town, distance from major intersection, etc.)		
	<u>Niagara-On-The-Lake</u>		
A3	Background information (i.e. rationale for conducting roundabout screening)		
	<u>Operational Improvement</u>		
A4	Site description (number of legs, lanes per approach)	Currently under signal control?	
	<u>Four legs, single lane approach</u>	<u>No</u>	
A5	Major street road classification	AADT	Posted & 85th percentile speeds
	<u>Arterial Road</u>	<u> </u> vpd	<u>60</u> <u> </u> km/h
A6	Minor street road classification	AADT	Posted & 85th percentile speeds
	<u>Local</u>	<u> </u> vpd	<u>50</u> <u> </u> km/h
A7	Forecast peak hour entering flow, total on all legs (greater than 2,500 vph may indicate need for two-lane roundabout)		
	<u>2161</u>		<u> </u> vph
A8	Current operational issues (i.e. high delays, queuing, etc.)		
	<u>High Delays</u>		
A9	Planned work on either road within next 10 years (Capital or Rehab programs)		
	<u>N/A</u>		

Part B Site-Specific Considerations

B1 Property Impacts

B1.1	Are existing property constraints (i.e. historical buildings, cemetery, etc.) within 10 m of the edge of the intersecting roadways?	<u>No</u>
B1.2	Is there opportunity to shift the roundabout to avoid this conflict?	<u>N/A</u>
B1.3	Are there environmentally sensitive lands or property on any corner that may be difficult to acquire?	<u>No</u>
Meets threshold for a roundabout being suitable?		<u>Yes</u>

The threshold is met ("Yes") if "No" is indicated, meaning that there should be no undue property impacts with a roundabout.

Roundabout Screening Form

Version dated May 21, 2021

Date 2025-12-22

Name(s) of Analyst(s) DC

Short Name of Intersection York & Townline

B2 Precluding Factors

B2.1 Are bridges or culverts within 100 m of the intersection?	No
B2.2 Are high-volume driveways within 100 m of the intersection?	No
B2.3 Are railway tracks or traffic control devices within 200 m of the intersection?	No
B2.4 Are existing or planned schools or significant pedestrian generators within 300 m?	No
B2.5 Are any approaches on a problematic vertical alignment that can't be corrected?	No
B2.6 Are there major utilities (i.e. Trans Canada pipeline, hydro towers) within or very close to the ROW?	No
Meets threshold for a roundabout being suitable?	Yes

The threshold is met if "Yes" is indicated for at most 1 of the precluding factors. If there is more than 1 precluding factor then the threshold is not met and the indication is "No", which means that a roundabout may be problematic at the subject intersection. This is not to say that a roundabout is not possible, just that there may be difficulties or higher costs.

B3 Suitability Factors

B3.1 Are capacity problems currently being experienced, or expected in the future?	Yes
B3.2 Is there a high proportion of turning movements at the intersection?	Yes
B3.3 Are any traffic signal justifications met or projected to be met in the next 2 to 5 years?	No
B3.4 Does the intersection have an unusual geometry (i.e. offset, skew, 5-legs)?	No
B3.5 Is the intersection at a town border or transition between rural and urban areas?	No
Meets threshold for a roundabout being suitable?	Yes

The threshold is met if "Yes" is indicated for 2 or more of the suitability factors. This means a roundabout should be technically feasible and possibly even preferred at the subject intersection.

Part C Safety Considerations

C1 Fatal Collisions

C1.1 In the past <u>10</u> years, how many fatal crashes have occurred at the subject intersection?	0
Meets threshold for a roundabout being suitable?	No

The threshold is met if there has been 1 or more fatalities.

Roundabout Screening Form

Version dated May 21, 2021

Date 2025-12-22
Name(s) of Analyst(s) DC
Short Name of Intersection York & Townline

C2 Injury Collisions

C2.1 In the past 5 years, how many non-fatal injury crashes have occurred? 0
Meets threshold for a roundabout being suitable? No

The threshold is met if there have been 2 or more collisions resulting in injury.

C3 Collisions by Type

C3.1 In the past 5 years, how many crashes have been head-on? 0
C3.2 In the past 5 years, how many crashes have been right angle? 0
C3.3 In the past 5 years, how many crashes have been turning movement? 2
C3.4 In the past 5 years, how many crashes have been from U-turns? 0
Meets threshold for a roundabout being suitable? No

The threshold is met if the total number of these types of collisions is 5 or more.

Should this location proceed to an Intersection Control Study? Yes

A "Yes" will be returned, indicating the subject intersection should proceed to an Intersection Control Study, when the Property Impacts threshold is met and 1 of the following 3 thresholds is also met:

1. *A "Yes" is returned under either the Precluding Factors or Suitability Factors*
2. *A "Yes" is returned under the Fatal Collisions*
3. *A "Yes" is returned under either the Injury Collisions or Collisions by Type*
