

PROJECT NOTICE
September 2023

Watermain Replacement & Extension
LINE 5 ROAD
Concession 2 Road to Concession 1 Road
&
CONCESSION 1 ROAD
Line 5 Road to Larkin Road

Dear Resident:

Alfidome Construction Niagara is scheduled to start the **Watermain Replacement and Extension Project** along Line 5 Road, between Concession 2 Road and Concession 1 Road, and on Concession 1 Road, from Line 5 Road to Larkin Road, the week of October 1, 2023. The work will consist of the installation of approximately 1000 meters of watermain on Line 5 Road between Concession 2 Road and Concession 1 Road and approximately 400 meters of new watermain on Concession 1 Road between Line 5 Road and Larkin Road. The work will take approximately 13 weeks to complete, weather permitting.

Commencing prior to the start date, OZA Inspections will begin pre-construction surveys of the homes and buildings fronting the construction site. The survey is being done to establish the pre-construction conditions of buildings and properties prior to the commencement of any construction activities at no cost to the homeowner. A representative from the inspection company will be requesting access to homes during the week. It is in the best interests of each homeowner that these representatives be allowed access to do a complete survey before any work starts.

At times, there may be some inconvenience to you during the construction period and we respectfully request your patience and co-operation during this period. Should access to your driveway be interrupted, you will be given notice from the Contractor. Access to driveways will be restored daily. Work hours will typically be 7:00 a.m. to 5:00 p.m., Monday to Friday.

If we disturb your property during the construction, our Contractor will carry out the necessary repairs as quickly as possible. With respect to sod restoration, please be advised that the Town's Contractor will be responsible for watering and maintenance of the sodded areas for a period of 120 days after placement. However, if you have an opportunity, additional watering would assist in sod growth. Please refrain from mowing the sod until the sod begins to root (a

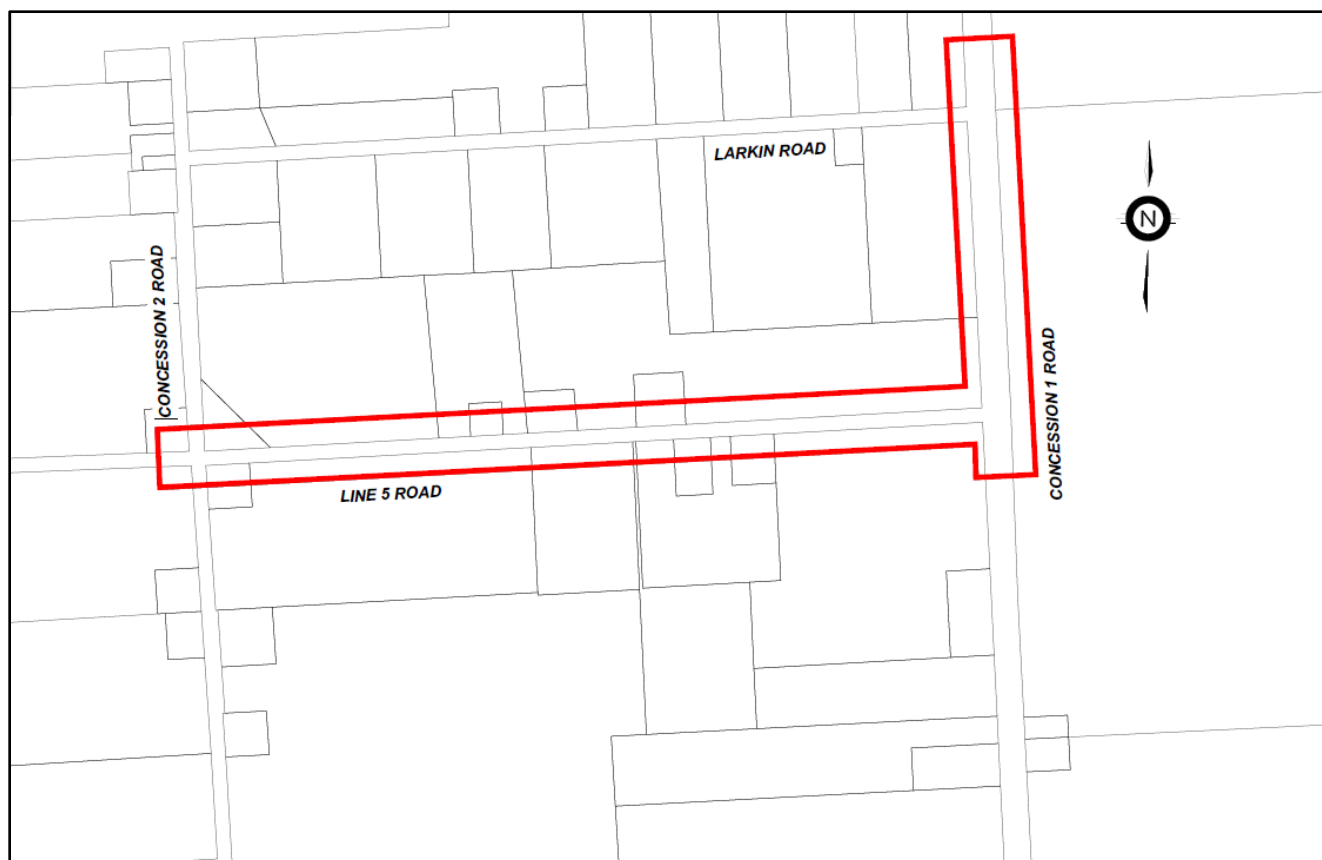

minimum of 14 days after installation). Restoration timing will be dependent on the availability of materials and weather conditions.

If you have an irrigation system or invisible fencing on the Municipal Right of Way, you must spray paint, white paint only, or stake out the location of your system within 6 metres of the roadway. Only systems which have been correctly located by the property owner and are damaged by the Contractor will be repaired. The property owner will be responsible for repairs to any system on Municipal property that is damaged and has not been located previously by the owner.

The Construction Inspector will advise you at the beginning of the project if any of your decorative or landscaping items (shrubs, hedges, fences, etc.) **are on Municipal Property** and conflict with the proposed works. It is requested that the property owners remove/relocate these conflicts that would otherwise be damaged, destroyed or removed and not replaced by the Contractor to accommodate the proposed works.

If you have any questions throughout the project concerning the work, please call the following:

Town's Project Manager:	Kiefer Paton	905-468-3061 x 319
Project Engineer:	Kerry T Howe Engineering	905-688-6550
	Kerry Howe Jr.	

All future project notices will be delivered to the affected property and posted on the Town's website (www.notl.com).
