PUBLIC NOTICE

Road Closure on Mississagua Street

November 13, 2026

WHAT: Construction is required on Mississagua Street between William Street and Gage Street to facilitate the installation of a new sanitary sewer. Due to the depth and complexity of the work, which will occur up to approximately seven metres below the existing roadway, a full road closure is required within the project area.
The active work zone will shift throughout the project as construction progresses; however, the overall closure area between William Street and Gage Street will remain in effect.

Residents within the closure area will continue to have access to their driveways, and emergency access requirements will be accommodated. General through traffic will not be permitted. Detour signage will be installed before the closure takes effect.

WHEN: The road closure is scheduled to begin on Monday, November 16, 2026, and is expected to remain in place for approximately six weeks, subject to weather conditions and construction progress. Additional scheduling updates will be provided as they become available.

COMMUNICATION: Information regarding the project will be posted on the Town's website and social media channels, with updates shared as key construction milestones are reached. Residents and motorists are encouraged to follow all posted detour signage and allow additional travel time when navigating the area.

Thank you for your patience and cooperation as the Town undertakes this important infrastructure improvement project.

CONTACT: Any inquiries regarding this work may be directed to Jordan Frost, Director of Public Works & Infrastructure, at Jordan.Frost@notl.com.
